- Operations Management
- Cross-Functional Leadership
- Stakeholder Management
- Vendor & Supplier Management
- 3PL Management
- KPI Management

Project & Process

- Project Management
- Process Improvement
- Cost Reduction Strategies
- Quotation Management
- SOP Development

Supply Chain & Logistics

- Supply Chain Optimization
- Logistics & Transportation Warehouse Mgmt.
- Demand Forecasting
- Inventory Management
- Production Planning
- Capacity Planning
- Shipping Documentations (CI, PL, HBAL, COO)

Tools & Technology

- SAP ERP
- Google Data Studio
- Xero
- Zoho CRM
- Jira / Trello / Notion
- SharePoint
- MS Office Suite
- Slack
- Cargowise

PROFESSIONAL EXPERIENCE

Operations Manager | ouvar (Remote: Australia)

January 2025 – July 2026

- Lead end-to-end logistics, warehousing, transportation, and supply chain operations supporting national retail activation programs.
- Drive macro operational strategy, cost optimization, and service delivery performance across multiple clients and external stakeholders.
- Deliver 10–18% freight cost reductions through strategic route optimization, and shipment consolidation.
- Maintain >95% DIFOT performance through strict despatch governance, proactive tracking, and rapid resolution of supply chain bottlenecks.
- Oversee project quotation frameworks and identify systemic cost efficiencies to improve profitability and corporate visibility.
- Lead, mentor, and build operational teams, managing KPIs, performance reviews, workforce planning, and continuous improvement initiatives.

- Develop and refine Standard Operating Procedures (SOPs) to establish baseline workflows and drive operational consistency.
- Serve as the primary escalation point for critical operational issues and customer service recovery.

Project Manager

Mar 2024 – Feb 2025

- Managed end-to-end execution of high-value client activation/campaign launch projects, coordinating 3PLs, warehouses, suppliers, and internal stakeholders.
- Developed comprehensive project plans, timelines, budgets, and risk mitigation strategies to ensure on-time, on-budget delivery.
- Introduced streamlined operational workflows and communication frameworks that reduced planning cycle times and improved cross-team visibility.
- Coordinated national campaign rollouts while ensuring strict adherence to client requirements, SLAs, and operational constraints.
- Supported quotation preparation, precise project costing, and resource allocation activities.

Virtual Assistant

Dec 2023 – Mar 2024

- Provided administrative and operational support across logistics pipelines, project coordination, reporting, and customer communications.
- Maintained project records, prepared progress reports, and coordinated communication between clients, suppliers, and internal teams.
- Supported process improvement initiatives, workflow automation, and operational reporting to maximize team efficiency.

Business Planner | Vishay Siliconix Philippines

2022 – 2023

- Ensured monthly target revenue was directly aligned with manufacturing production output plans.
- Developed a centralized capacity planning system to maximize manufacturing efficiency and line utilization.
- Designed an automated raw material planning tracker to identify supply-demand gaps and mitigate critical stockout risks.
- Managed SAP-driven material planning, production scheduling, and inventory control processes.
- Collaborated with manufacturing, procurement, and supply chain teams to optimize on-time delivery performance.

Data Entry Specialist – Inventory Management | Lettered L Food Services

2020 – 2022

- Maintained inventory accuracy through rigorous data validation, periodic reconciliation, and status reporting.
- Developed and standardized product SKUs for efficient, scalable inventory monitoring across kitchensites.
- Translated raw inventory consumption metrics into actual costing data for accurate financial reporting.
- Aligned supply, consumption, and demand gaps across sites to prevent stock variances and readjust replenishment levels.

Business Planner | Integrated Micro Electronics (IMI)

2019 – 2020

- Monitored and maintained material shortage reports, supply plans, and daily SAP transactions.
- Generated responsive weekly production and shipment plans to meet dynamic customer demands.
- Coordinated cross-functionally with engineering and procurement to align execution with capacity realities.

Production Planner & Inventory Controller | Nitto Denko Philippines

2018 – 2019

- Created and issued production job orders and generated daily manufacturing and shipment plans.
- Planned and controlled inventory for direct and indirect materials, ensuring raw material availability forlive production lines.
- Provided real-time shipment progress updates to the Sales department.

Production & Capacity Planner | Tokai Rika Philippines

2015 – 2018

- Led capacity planning, production scheduling, and material allocation in a Just-In-Time (JIT) manufacturing environment.
- Analyzed machine and production load capacity based on sales and demand forecasts to optimize resource utilization.
- Managed SAP planning transactions, inventory targets, and supply planning to support seamless material availability.
- Collaborated cross-functionally with Procurement, Manufacturing, Engineering, and Supply Chain to proactively mitigate capacity bottlenecks.

Import & Export Staff | Palmphil Garments

2015

- Prepared waybills, commercial invoices, and shipping documentation for international transit.
- Handled freight forwarder queries and rate logistics negotiations.
- Prepared and filed PEZA (Philippine Economic Zone Authority) compliance documents.

EDUCATION

Master of Business Administration (MBA)

2023 – 2024

Philippine Christian University

Bachelor of Business Management – Operations Management

2011 – 2015

STI College
